

**AMENDMENTS TO THE SPECIFICATION**

**Please amend the second full paragraph on page 11 as follows:**

The printer 11, as will be explained later, comprises a file transfer unit 12, a storage unit 13, a configuration file generator 14, a setup reference unit 15, a setup change unit 16 and a printing unit 17. The file transfer unit (hereinafter also referred to simply as a “transfer unit”) 12 that serves as transfer means is so designed that file transfers can at least be performed in accordance with the FTP protocol. The transfer unit 12 received print data from the computer and stores them in the storage unit 13 that serves as “storage means.” The storage unit 13 can be, for example, a hard disk, a memory or the like. Further, the storage unit 13, configuration file generator 14, setup reference unit 15, and setup change unit 16 can constitute a file transfer protocol file server 19.
